Date: 12th October, 2026

To Whom It May Concern:

Dear Prof, Assoc. /Assist. Prof, Sir/Madam,

LETTER OF RECOMMENDATION

It is my pleasure to recommend Mr. Yash Varshney for admission to your esteemed institution. I had the opportunity to work with Yash as a co-author on our research paper, *"Service-Effective Frontiers for Distributed Quantum Sensing Over Time-Varying LEO Optical Networks,"* published in the *International Journal of Satellite Communications and Networking*. Through our research collaboration, I became familiar with his contribution to a technically demanding research project involving distributed quantum sensing, low Earth orbit (LEO) optical networks, simulation, and statistical analysis.

What makes Yash's research experience particularly noteworthy is his involvement in advanced scientific research while still pursuing his Class XI studies. Contributing to research at this stage of his academic journey reflects a commendable willingness to explore complex scientific problems beyond the conventional school curriculum. His participation in this work demonstrates an emerging interest in interdisciplinary research at the intersection of quantum technologies, optical communication networks, and computational analysis.

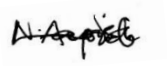

Our research required engagement with sophisticated technical concepts, analytical reasoning, and the interpretation of simulation-based results. Yash's involvement in this research environment provides a meaningful foundation for his continued academic development. His research contribution also reflects the value of intellectual curiosity, initiative, and a willingness to engage with challenging questions in emerging areas of science and technology.

I believe that Yash has considerable potential to develop his analytical and research capabilities further through rigorous university-level education. With appropriate academic guidance, opportunities for hands-on learning, and continued exposure to research, he can build upon this early experience and pursue increasingly challenging intellectual endeavors. His early engagement with collaborative research may also serve as a valuable foundation for developing the critical thinking, technical competence, and independent learning skills essential for success in higher education.

I am pleased to support Yash's application for further academic opportunities. I believe he would benefit from an intellectually stimulating academic environment that encourages curiosity, interdisciplinary learning, and research exploration. I recommend him for consideration by your institution and wish him every success in his future academic pursuits.

Please feel free to contact me at **alasisi@kku.edu.sa** if further information is required.

Yours Sincerely,

Ayodele Lasisi, Ph.D., M.Sc., B.Sc.
Assistant Professor
Department of Computer Science
College of Computer Science
King Khalid University
Abha, Kingdom of Saudi Arabia
